

Item Name: Super Frozen Escolar Saku

INTRODUCTION

Escolar, also known as Snake Mackerel or Waloo, is a dark fast swimming fish that can not metabolize wax esters found in its diet. Due to the high oil content, discolouration may happen over time. But with the super frozen technology, the blood is drained as soon as the fish is caught, and placed in our -60 super freezer while it's still on our ship. We've also processed it into saku cuts for better convenience.

- Origin: Taiwan
- Wild Caught
- No Chemical Treated
- 22LB / Case
- HACCP / FDA Certified
