

**Item Name:** Negitoro

### **INTRODUCTION**

Negitoro is simply the leftover tuna that can't be sliced nicely into sashimi slices. It's the deliciously, fatty meat that is scraped off around the bones and off the skin.

This product is convenient and easy to use. The tuna is already minced, and can be used right after defrosting. Our Negitoro isn't like other ordinary minced tuna, the meat comes from Big Eye Tuna and it is mixed with high end fish oil - it is much more rich in flavor.

- Product of Japan
- 500g / Pack
- HACCP / FDA Certified
