

Item Name: Super Frozen Tuna Saku

INTRODUCTION

Quite simply, tuna with yellow fins. Flavor-wise, they're similar to the bigeyes. In Japan, yellowfin tuna are the most commonly found tuna and are served widely in many casual sushi spots.

Our tuna saku are not like regular frozen tuna. We keep it at an ultra cold temperature (-60) to ensure the tuna quality is exceptional and bacteria free. It is also tasteless smoked so the colour would not change easily.

- Origin: Taiwan
- Wild Caught
- No Chemical Treated
- 22LB / Case
- HACCP / FDA Certified
- Tasteless smoked
